I would like to see Microsoft broken up. If not broken up, then the government needs to keep a very close watch on them. Microsoft shouldn't decide on their punishment. The courts should, and the punishment should not be in Microsoft's favor. The giving 1 billion \$ of microsoft products to schools is just feeding the monopoly fire! Microsoft's business practices are down right EVIL. It amazes me at how they could get away with most of the stuff they do. Microsoft's punishment needs to be harsh.
